## Ministry Update

### ***We Made It!***

We just completed our first big trip into Mozambique (over 3,000-mile round trip). Our first destination was the Mocuba where we were warmly received at the Operation Mobilization (OM) Missionary Training Center (and not just talking about the weather which was warm!). We spent two wonderful days at the center, sharing, and what they do. Then we joined the students on a mission trip up to Lugenda, a Muslim Yao village in the far north country near the boarder of Tanzania which is an unreached people group. Pray for us to see God's leading for in this unreached area of Africa.

### ***Preparing Mozambican Missionaries***

Antonio and his wife Maria lead the school there in Mocuba. Antonio challenged us with his deep desire to train missionaries there in Mozambique for the north of the country which is largely unchurched.

### ***Fernando Wants To Be A Missionary To The Makuwa And Yao***

One of the students who will graduate in November is Fernando. He became a Christian several years back a God calling him to go and learn more about the Bible so he could return and plant churches among his people are unreached. When he heard there was a training center in Mocuba, he quit his teaching job and moved there his family. Now he and his wife and two small children are considering moving to the Muslim village of Lugenda the Yao and begin planting a church. Pray that the right doors and opportunities will open for them.

### ***Visit To A Muslim Village***

We were surprised by the wonderful reception we received by the Muslim chief of the village of Lugenda. Antc his students have visited this village several times and have built up a good reputation in the village. We gave lbs. of hybrid corn seed as a gift to the people there. They struggle growing their food because the elephants c and eat the corn if they don't keep guard and protect their fields. Also, Antonio purchased notebooks and pencils for the local school.

## ***A "PNG" Missionary In Mozambique***

We were surprised to find many missionaries from other parts of the world. Simon is from Papua New Guinea, has been working with the OM training center for the last three years. He will be returning to his home in the next few months. When we got to town of Cuamba, we met a Brazilian couple and two single Brazilian women, as well as several families from Australia. We also stopped to greet an American couple in Marrupa, which is 100 miles from the Muslim village we visited.

### ***Prayer Needed***

Our vision for Mozambique is to work among an unreached people group. The entire northern part of Mozambique is basically Muslim, with nominal Catholics and pagans. The evangelical Christians are a small segment of the scene. We need your prayers for guidance for any future involvement with the wonderful people we met in northern Mozambique.
